AX

FINANCIAL GROUP

What is AX Financial Group?

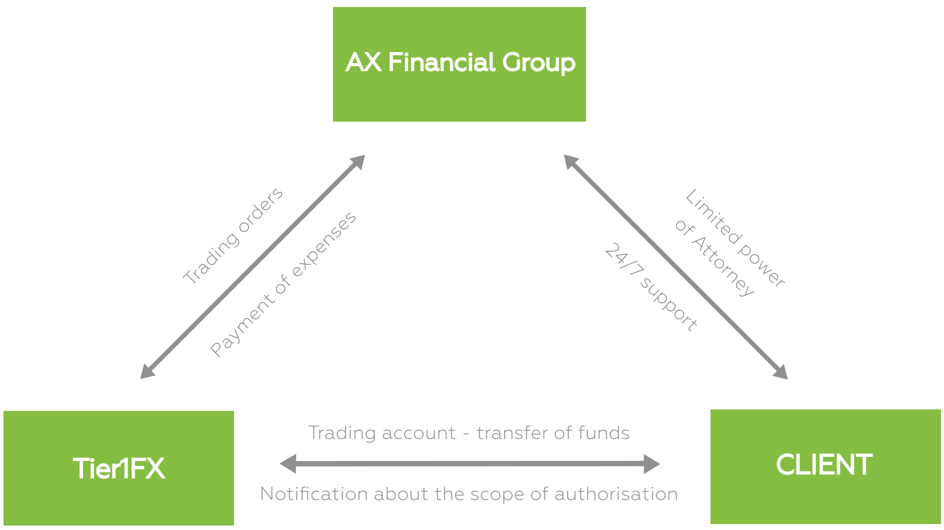
AX Financial Group is introducing a new opportunity and enables unique increase of the asset value. With its transparency, it provides a safe way of asset investment with limited risk and relatively high expected profitability. It presents an integrated solution for individuals and companies that wish to participate in currency markets but simply do not have enough time, information or knowledge.

Why AXgreen?

- Own trading account
- Only the client has access to the assets
- 24/7 insight into your own trading account
- Excellent services for clients
- Use of the best instruments for risk management

Tripartite contractual relationship

AXgreen is an investment form that ensures maximum possible client protection according to the international financial standards. The client pays the investment directly to his/her trading account and is the only rightful claimant for the disposal of assets. Trading strategy is executed through Tier1FX, online trading division of Hogg Capital Investments ltd, authorized by the MFSA (Malta Financial Service Authority) and registered by the FCA (Financial Conduct Authority). All the relationships are governed by a tripartite contract.



Simple entry in five steps

1. Opening an individual trading account
2. Signing the authorisation for management
3. Transfer of funds
4. Start of trading
5. Insight into the trading account

"The decisions we make are based on the many years of experience of our experts. Together with you, we wish to develop rational and perspective investment strategies that will satisfy your expectations".

Participation in profit	63 % client – 37 % company (High-Water Mark)****
Transparency	24/7 insight into own trading account

* Investment in financial instruments is related to various risks and is optimal for the investor when the ratio between the risk and the expected profitability is appropriate. The investor must accept possible risks and regularly monitor his/her investment. The expected profit percentage is based on past performance and does not guarantee future results.
** Contract period is not defined; the investor achieves optimal results over a longer period. We recommend an investment duration of at least 3 – 5 years.
*** Payment (of a part or total) of assets can be carried out at any time with a written request of payment. The assets are paid to the investor's bank account in 5 – 8 working days. Regardless of the duration of the contract period, the exit costs are not charged to the investors.
**** The profit is accounted quarterly by the 10th day of the first month of the quarter. High-Water Mark is a way of accounting the performance fee that prevents the trader charging the profit sharing to the client until the investment value exceeds the last highest value. If the results of the trading strategy execution are negative in a certain period, the trader is entitled to profit sharing only after he/she settles the loss in the client's trading account by newly made profits and exceeds the previous highest level.
